

AMENDMENTS TO THE CLAIMS

Please amend Claim 1 as follows.

LISTING OF CLAIMS

d1 1. (Currently Amended) A damper comprising:

a closed pressure tube having an inner ~~[[wall]]~~ cylindrical surface which forms a sealed working chamber;

a piston disposed within said sealed working chamber, said piston slidably engaging said inner cylindrical surface of said pressure tube to divide a first portion of said working chamber into an upper working chamber and a lower working chamber;

a first flow path extending through said piston to provide communication between said upper working chamber and said lower working chamber;

a valve body disposed within said working chamber to define with said inner cylindrical surface of said pressure tube a fluid chamber located in a second portion of said working chamber, said valve body being fixedly secured to said inner cylindrical surface of said pressure tube; and

a second flow path extending through said valve body to provide communication between said lower working chamber and said fluid chamber, said second fluid flow path being a continuously open flow path.

2. – 5. (Cancelled)

6. (Original) The damper according to Claim 1, further comprising a compression valve assembly attached to said piston, said compression valve assembly prohibiting fluid flow from said upper working chamber to said lower working chamber.
